

Tollyjoy® IQ LCD baby food & bottle warmer (instruction manual)

Numerical temperature control

Easy to use digital display

Automatic temperature preservation

Usage Instructions

1. Put bottle with milk or baby food into the warmer. Pour water into the unit, ensuring that the water covers the milk or food level but does not overflow.
2. Connect the unit to the power supply
Switch on the unit by pressing the “on/off” button to start the warming cycle.

a. Default temperature of unit is 36 degree celsius and the highest temperature is 70 degree celsius.

- b. Press ‘(+)’ to increase and customize target temperature.
c. Press ‘(-)’ to decrease and customize target temperature.

Note: Temperature reflects temperature of water in warmer, and not the milk/food in the bottle/jar.

40 to 45 degree celcius is the preferred temperature for feeding.

3. Warms 125ml/4oz milk at room temperature in approximately 15 minutes.
4. Once unit reaches pre-set temperature, it will go into heat preservation state automatically, keeping it warm.
5. Press the "on/off" button to switch off the unit.

Cleaning Instructions

1. Switch off the power supply before cleaning.
2. Rinse heating cup with warm water and wipe dry with clean cloth.
3. Clean warmer unit by wiping with a wet cloth. Ensure that water does not set in base of the unit.

Cautions

1. Keep unit out of reach of children.
2. Do not immerse unit into water, during cleaning.
3. Do not place unit directly under sunlight.
4. Switch off the power supply after usage.
5. If unit is not working, contact the manufacturer for repair.(Refer to Terms of Warranty)
